¶ The advertising value of attractive Letter Paper is recognized by the best advertisers. VARIETY in Correspondence Stationery also has a recognized value in advertising lore. Try it, and prove it yourself.

July 1907.

To Enterprising Advertisers,
Everywhere.

The best advertisement is the one which successfully attracts instant attention to any proposition you may offer prospective customers.

The best method yet devised to reach a large number of people simultaneously - and do the work in an effective manner - is through the medium of the "Fac-simile Letter."

The name "Fac-simile Letter" is original with us. It means just what it says, not "near fac-simile" letters, but letters which are actual duplicates of original typewritten letters, with name and salutation inserted to exactly match the body of the letter, and thereby make each individual letter "personal" so far as the recipient is concerned.

We are prepared to back up the above strong statements with

means just what it says, not "near fac-simile" letters, but letters which are actual duplicates of original typewritten letters, with name and salutation inserted to exactly match the body of the letter, and thereby make each individual letter personal so far as the recipient is concerned.

We are prepared to back up the above strong statements with satisfactory results to you.

Besides printing these letters, we attend (if desired) to all the details in connection with their production, furnishing the letter heads and envelopes, filling in letters, addressing envelopes, folding, enclosing, sealing, stamping and posting them in any quantity desired.

We also furnish lists of any line of trade or industry at reasonable prices.

Call on us for anything you may desire in this line or for printed matter of any character of good quality.

Yours truly,

Gillett & Company
